Projects

Movie Night Randomizer |

<https://github.com/CarlJMcGee/movie-picker> |

<https://shit-screen-movie-picker.vercel.app/>

Description: A site for organizing my movies for my friends to see what I have available and add movies to a wish list for me to find and purchase later.

My Contribution: The project was created and is maintained by myself.

Tools Used: Made using the T3 Stack (Typescript, Tailwind, TRPC, Prisma, Next.js, NextAuth), and Bootstrap React

Neighborhood chat/social site |

https://github.com/CarlJMcGee/Geo-Chat_Neighborhood-group-chat |

<https://geo-chatneighborhood-group-chat-production.up.railway.app/>

Description: A site for locals to connect and socialize online with the people living around them. Sign up with your city name and be automatically added to your neighborhood's homepage

My Contribution: Worked on the database design and implementation as well as the API endpoints

Tools Used: Made using Vanilla Javascript, Express, and Handlebars.

Avatar Legends TTRPG online character sheet |

<https://github.com/CarlJMcGee/Avatar-Legends-character-sheet> |

<https://avatar-legends-character-sheet-production.up.railway.app/>

Description: An unofficial online character sheet alternative for the Avatar the Last Airbender tabletop RPG by Magpie Games.

My Contribution: The project was designed and created by myself

Tools Used: Made using Vanilla Javascript, Express, and Handlebars.

Experience

Automation Specialist
